DATA QUALITY & STATISTICAL EVIDENCE

Data Integrity | Statistical Significance | Linkage Limitations | Audit Controls

METHODOLOGICAL LIMITATIONS

- Seller linkage is incomplete: only 340 of 656 mature deals (51.83%) could be linked to order records.
- Observed activation is not equivalent to true non-activation for unlinked sellers.
- Advertising spend by acquisition origin is unavailable, so channel ROI cannot be calculated.
- Acquisition-origin comparisons are observational and do not establish causality.
- The 90-day maturity cutoff uses a minimum threshold of 50 orders per day, excluding 186 immature deals.

check	detail
deals_without_seller_id	Excluded from seller outcomes; never assigned zero
mature_windows_ending_after_data_end	Must equal zero
negative_item_price_rows	Rows requiring review; retained unless source definition indicat
null_item_price_rows	Null item-price rows; zero-filled only for aggregate summation
unparsed_deal_won_dates	Source dates failing parsing
unparsed_lead_contact_dates	Source date strings failing parsing
unparsed_order_purchase_timestamps	Source timestamps failing parsing
invalid_or_negative_close_days	Missing dates or won date preceding first contact date
negative_close_days	Won date precedes first contact date
deals_with_matching_lead_pct	Share of deal rows with matching qualified-lead record
order_items_with_matching_order_pct	Share of order-item rows with matching order record
immature_seller_deals_excluded	Excluded from mature seller outcomes, not treated as zero
last_qualifying_purchase_day	Last day with at least 50 orders
data_end	Exclusive maturity boundary: qualifying day + 1 calendar day
max_order_purchase_timestamp	Absolute latest purchase timestamp; includes sparse tail
observed_activated_linked_mature_sellers	Observed successes; unlinked outcomes excluded
mature_seller_deals_linked_to_order_items_count	Mature deals with seller ID appearing in order_items
closed_deal_sellers_found_in_order_items_count	Closed-deal seller IDs present in any order-item row
activation_lower_bound_all_mature_pct	Conservative lower bound treating every unlinked mature seller
closed_deal_sellers_found_in_order_items_pct	Cross-dataset linkage rate; unmatched sellers are unobserved
min_daily_orders_rule	Minimum order count on a calendar day to support maturity
mature_seller_linkage_rate_pct	Denominator is all mature seller deals
non_delivered_orders_with_delivery_date	Non-delivered status but customer-delivery timestamp exists
mature_seller_deals	Deals with complete 90-day purchase observation window und
delivered_orders_without_delivery_date	Delivered status but no customer-delivery timestamp
orders_outside_data_end	Raw order records with purchase timestamp >= exclusive data_
closed_deal_seller_id_unique	duplicate seller IDs=0
deal_mql_id_unique	duplicate keys=0
lead_mql_id_unique	duplicate keys=0
order_id_unique	duplicate keys=0
order_item_composite_key_unique	Duplicate (order_id, order_item_id) rows
seller_value_mql_id_unique	Seller mart grain is one row per closed deal/MQL
